ALM Positioners' New Heavyweight Champion

Introducing the MHL2P 75,000 lb. Capacity Headstock/Tailstock Positioner

June, 2015 – Rock Island, Illinois **ALM POSITIONERS HAS RECENTLY INTRODUCED THEIR NEW 75,000 lb. CAPACITY MODEL MHL2P HEAD AND TAILSTOCK POSITIONER.** The MHL2P features : 73" vertical travel in 80 seconds; 4 hp column mount hydraulic units for lifting and lowering; electronically equalized lifting columns; solenoid operated safety pawls in each column; 15 hp for variable speed rotation; .2-.5 rpm; 360° rotation; rotator with 416,000 inch pounds of torque; and optional wireless foot control. It is available in fixed or adjustable tailstock models.

ALM Positioners eliminate dangerous, old-fashion belts, chain transfer and screw systems and allow the operator to raise and position his weldments or assemblies to a convenient height and working position. **ALM Positioners** can be custom designed to meet your specific requirements and provide improved weld quality; simplified tool access; consistent repeatable assembly procedures; higher productivity and reduced consumables; proper ergonomics with reduced operator fatigue and injury risk; and higher throughput and profits.

ALM Positioners is a successful manufacturer of unique headstock/tailstock positioner lifts. Manufactured in Rock Island, Illinois, in a state of the art manufacturing facility, **ALM's** unique positioner designs have proven to be a more cost effective equipment investment that Improves safety for welder and operator and improved weld quality while boosting production throughput as much as 35%.
