

A **LEADER** in Lifting
And Positioning Equipment.

FOR IMMEDIATE RELEASE

ALM Positioners Announces Rotary Contact Welding Ground

September 2016 - Rock Island, Illinois

ALM Positioners has developed and built in house a new Rotary Contact Welding Ground that eliminates the need to ground directly to the tool or part. Available in 400 and 800 amp welding ground options, the contact accepts standard 4/0 cable lugs.

ALM Positioners is a manufacturer of unique headstock/tailstock positioned lifts. Their unique positioned designs have proven to be a more cost effective equipment investment that improves safety for welder and operator in addition to improving weld quality while boosting production throughput as much as 35%.
